The General Contractors Association of Hawaii is proud to present:

PROJECT MANAGER DEVELOPMENT PROGRAM

The Associated General Contractors of America’s Project Manager Development Program (PMDP) is designed for early-career project managers and those looking to move into such a role.

Professionals with less than two years of project-related experience in the commercial construction industry will benefit most from participating in this program. Experienced construction specialists who may be considering a career move into project management will also benefit by participating, as will individuals working in companies that have adopted a team-based management structure for their projects.

Module 1 | Estimating and Job Costing

Develop professional estimating skills, including: an understanding of the different types of estimates; the importance of documentation and formatting; and the link between design, estimating and project costs. Gain awareness of how accurate cost-information is critical to the success of the company and how equipment costs are developed and integrated into the estimate.

- Introduction to Estimating Basics
- Project Planning and Setup
- Estimating Costs for Specific Tasks
- Estimating Costs Not Associated with a Specific Task
- Estimating Costs of Work by Others
- Putting Estimates into Action
- Estimating Redesign and Revisions
- Project Contributions to Corporate Profits

Program Completion Certificate

Upon completion of each individual module, participants will receive a course certificate. Participants who complete all five courses need to submit a PMDP application to AGC of America in order to receive the AGC PMDP Certificate of Completion. All who complete the full program will be honored at a GCA Membership Meeting where their commitment and accomplishment will be recognized by the industry.

Please see attached for the registration form.
