The General Contractors Association of Hawaii is proud to present:

PROJECT MANAGER DEVELOPMENT PROGRAM

The Associated General Contractors of America’s Project Manager Development Program (PMDP) is designed for early-career project managers and those looking to move into such a role.

Professionals with less than two years of project-related experience in the commercial construction industry will benefit most from participating in this program. Experienced construction specialists who may be considering a career move into project management will also benefit by participating, as will individuals working in companies that have adopted a team-based management structure for their projects.

Module 3 | Project Administration

Gain an awareness of how pre-project planning affects the potential success of a project and understand the different areas of planning for the construction phase of a project. Broaden your understanding of the impact building codes, permits, reviews and inspections can have on a project. Learn how Building Information Modeling (BIM), LEED®, environmental issues and lean construction are impacting the construction industry.

- Introduction to Project Safety
- Project Planning, Staffing and Partnering
- Planning for Environmental and Sustainability Concerns
- Project Scheduling
- Codes and Permits
- Material Handling
- Documentation and Visualization
- Project Closeout

Program Completion Certificate

Upon completion of each individual module, participants will receive a course certificate. Participants who complete all five courses need to submit a PMDP application to AGC of America in order to receive the AGC PMDP Certificate of Completion. All who complete the full program will be honored at a GCA Membership Meeting where their commitment and accomplishment will be recognized by the industry.

Please see attached for the registration form.
